EXPERIENCE

HostyWeb - Chile | Front End Developer

Nov 2023 - Jan 2024

Development of an IT recruitment page involving companies, recruiters, and IT workers, using technologies such as React, Typescript, testing with Jest, Redux Toolkit, Styled Components, and Node.

Andromeda - Colombia | Full Stack Developer

Development of a Web3 application for the transfer of electrical energy through tokens using the Algorand blockchain. The application is built using Tealscript, Typescript, React.js, Javascript, and TailwindCSS.

EDUCATION

Coderhouse - Mobile Development with React Native

May 2024 - Actually

Coderhouse - Web Development with Next.JS

Mar 2024 - May 2024

UPSA - Database with MySQL

Nov 2023 - Dic 2023

UPSA - Programming Python

Aug 2023 - Oct 2023

Henry Bootcamp - Full Stack Web Development (PERN)

May 2023 - Aug 2023

UTN - Programming Java

May 2022 - Nov 2022

PROJECTS

iTech - Autonomous

Mar 2024 - May 2024

Academic Experience: Coderhouse

Development of an eCommerce platform with complete CRUD functionality for product management on a computer. Delivered a comprehensive user experience with an intuitive and user-friendly interface. Implemented an admin profile to manage product creation, editing, and deletion.

Tech stack: React.js - Next.JS - TailwindCSS - Firebase.
[GitHub Repository](#)

Digital Watch - Autonomous

Nov 2023

Development of a multifunctional digital clock. Provides accurate information about hours, minutes, and seconds of the current day, offers a comprehensive view of the week by indicating the current day along with the other days of the week. Displays the complete date, including day, month, and current year.

Tech stack: React.js - Typescript - Vite - TailwindCSS.

[Deploy](#)

[GitHub Repository](#)

To Do List - Autonomous

Oct 2023

Development of a To-Do List with complete CRUD functionality in TypeScript, allowing the addition of new tasks, the ability to modify their titles, and the option to delete them. Additionally, it should include filters by task status (e.g., tasks in progress, completed tasks) and display the count of tasks in progress.

Tech stack: React.js - Typescript - Vite.
