*EXPERIENCE*_____

Andromeda - Colombia | **Full Stack Developer**

Development of a Web3 application for the transfer of electrical energy through tokens using the Algorand blockchain. The application is built using Tealscript, Typescript, React.js, Javascript, and TailwindCSS.

Full Stack Henry Hero   Aug 2023 - Sep 2023

Academic experience: Henry Bootcamp

- *Coordinating a group of students to achieve integration into the study group.*
- *Guiding students in their initial steps during the course.*
- *Assisting in exercise resolution and promoting group collaboration (Pair Programming).*
- *Proposing ideas for improving Bootcamp processes.*

*PROJECTS*_____

Digital Watch - Autonomous   Nov 2023

Development of a multifunctional digital clock. Provides accurate information about hours, minutes, and seconds of the current day, offers a comprehensive view of the week by indicating the current day along with the other days of the week. Displays the complete date, including day, month, and current year.

Tech stack: React.js - Typescript - Vite.
Deploy
Repositorio en GitHub

To Do List - Autonomous   Oct 2023

Development of a To-Do List with complete CRUD functionality in TypeScript, allowing the addition of new tasks, the ability to modify their titles, and the option to delete them. Additionally, it should include filters by task status (e.g., tasks in progress, completed tasks) and display the count of tasks in progress.

Tech stack: React.js - Typescript - Vite.
Deploy
GitHub Repository

Pig Commander Finance App - Autonomous   Ago 2023 - Sep 2023

Academic Experience: Henry Bootcamp

Development of a personal finance management application. Objective: Monthly cash flow recording, expense simplification, investment tracking, savings goal setting, and news inquiry.

Tech stack: React.js - Redux Toolkit - NextJs - Tailwind - NodeJs - Express - PostgreSQL - Sequelize - PostgreSQL y Sequelize.
